Windows 8/8.1 VPN Security Bug Fix

1. Navigate to the **Control Panel**
2. Click on **Network and Internet**

3. Click on **View network status and tasks**
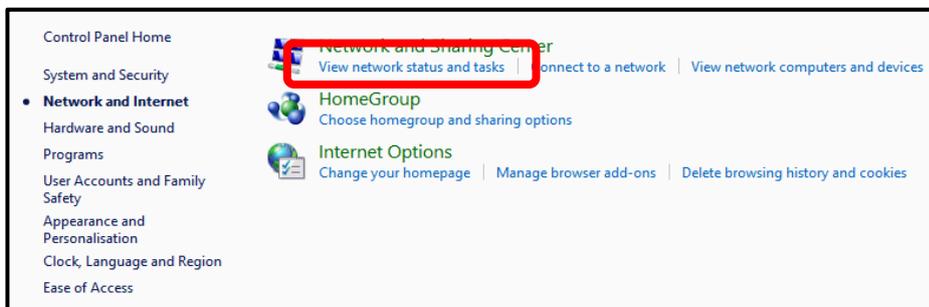

4. Click on **Change adapter settings**
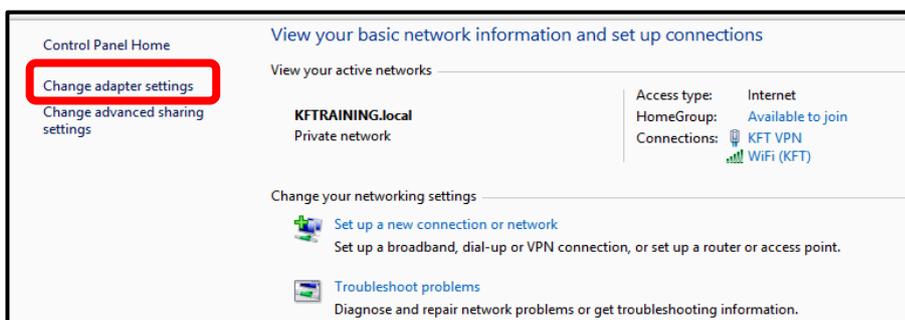

5. Right click on **KFT VPN**
6. Click on **Properties**
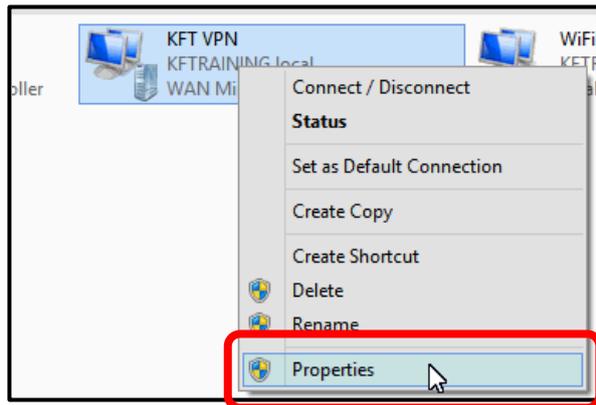

7. Click on the **Security** tab
8. Check the box **Microsoft CHAP Version 2**
    Also ensure all settings in the **Security** tab match those in the picture below
    Click **Ok**, you can then close all of the **Control Panel** windows
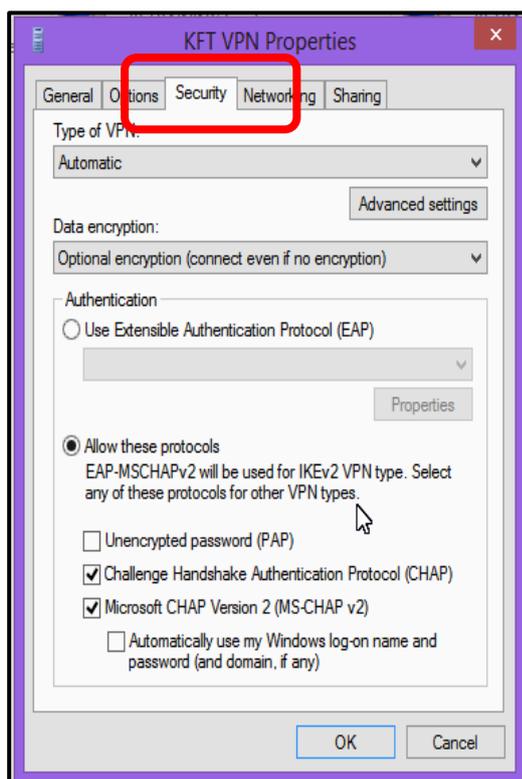

You should now be able to successfully connect your **VPN**.

Not working? Make sure you entered your email and password correctly and try again.
